

PACKAGING DECLARATION

Dear valued vendor

At Arco, we are committed to the protection of the environment and compliance to the regulations governing our industry.

As part of this we want to ensure that recycled materials are extensively used in the packaging of products we purchase from you. In particular, we require all plastic packaging used on Arco products to contain a minimum of 30% recycled plastic to align with the requirements of the UK government's new Plastic Packaging Tax. This requirement applies to all products arriving in the UK from 31 March 2022.

We need to collect information from you to allow us to report our packaging information as well to identify steps we can take to further reduce packaging and increase the use of recycled material.

This declaration relates to products branded Arco, Arco essentials, ArcoPro or TROJAN only.

Please complete and sign this form. It must be returned to your usual Arco contact with in a month of request.

PACKAGING DECLARATION

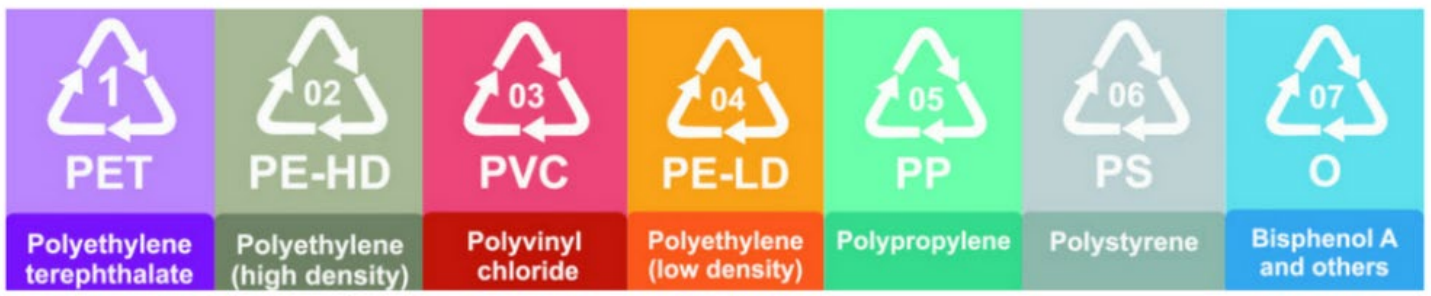

Plastic packaging

Does the packaging currently contain a minimum of 30% recycled plastic?

What is the % of recycled plastic in the packaging?

Is the recycled content supported by a certificate or material data sheet?

Please indicate which plastic material(s) are used. Select all that apply.

Cardboard and paper packaging

What is the % of recycled cardboard / paper?

Is the recycled content supported by a certification, such as FSC?

Declaration

I acknowledge the importance of this declaration and hereby declare the information provided is accurate to the best of my knowledge. I accept that Arco may need to audit my factory and sources of supply to validate the information provided.

I confirm that we shall not reduce the recycled content from the levels declared above without prior written consent from Arco.
